FALL TREND REPORT

Hello again! Are you ready for cooler weather? Here are some “cool” ideas for your fall look! We all know that summer brings warm colors and fall brings cooler colors. Hair and clothing create you unique ensemble. This season, hair trends are inspired by the 1940’s and 70’s, chic style, soft waves, no firm curls, off-centered parts, sexy confidence with simple style. Hottest looks this season includes up do twists, complex braids, long waves, chignon, 70’s center part with long lengths, blond and reds with light eye brows, slicked back euro style, short black hair, pixie crop, hair accessories with decorative head bands, style that radiates.

What to wear?? Silhouettes of the 1950’s & 60’s with hip-hugging dresses below the knee, 70’s flowing dresses in high-shine fabrics, 70’s glam is back with metallic hues, a balance of boldness and softness, military fashion with army green, heavy military jackets with large buttons, lingerie as outerwear, exposed bras, delicate laces, leather shorts, leggings and dresses, classic buttoned-up collared shirts, cut out and sheer clothing, thigh high boots, high heeled clogs, socks under heels.

Now for those of you who need a simple make over with a simple budget, here are some tips for you. Invite your friends over for a clothing exchange party. Make a collage of the latest style combinations and color pallets with current fashion magazines. Of course you will

serve tapas, drinks and have cool music that inspires everyone’s creative side. Tell your friends to bring clothing items, hand bags, accessories, jackets, shoes etc. You will have a blast creating ensembles that are truly unique! Remember to organize the party to make the exchanges fair for everyone. Drawing numbers always works. It’s always fun to use the Chinese Christmas style which allows the higher numbers to steal the items that are already chosen. Have fun creating unique styles from multiple closets.

Until next time,

You’re Friend,

Yai Yai
